

Twenty20™ SmartLock

The secure, reliable and cost-effective way to control access to your remote assets.

Built for professionals and designed for rugged, off-grid locations, the water-resistant, impact-resistant Twenty20 SmartLock immediately increases your asset protection by creating an audit trail of access information. With our SmartLock, the user's smartphone is literally the key that opens the lock. Using the Twenty20 app, the phone sends a signal that opens the lock – even in areas without cellular connectivity. With no more lost or forgotten keys or shared combination codes, the Twenty20 SmartLock is light-years ahead of obsolete padlocks.

FLEXIBLE ACCESS CONTROL

With the Twenty20 SmartLock, you have total control over who opens your locks. From the Twenty20 web-based dashboard, you can authorize or deauthorize users with ease. You don't even need the lock in your possession to program it – you control it all remotely through the dashboard. The user's name, timestamp and GPS location is recorded every time a lock is opened or closed so you have a full audit trail for each lock that you can view anytime, from anywhere.

THE TWENTY20™ ADVANTAGE

Stand-alone systems operate with no power or connectivity

Rapid deployment solutions for remote sites

Integrated view of sites via browser-based dashboard

Real-time video insights and historical reports

AI-enabled software increases efficiency and reduces false alarms

BENEFITS

- > Reduce theft and vandalism and keep your assets safe
- > Reduce downtime for contractors, allowing instant access to locations
- > Avoid expensive re-keying when an employee leaves or keys are lost
- > Bluetooth low-energy technology allows mobile app to interact with lock without Internet access
- > Weatherproof and tamper-resistant, featuring military-grade AES 128-bit encryption
- > Grant, edit or revoke access to locks in real-time online
- > Individual trackable “key” per lock, per user
- > Issue single-use codes for one-time access
- > Actionable insights and historical reports available online
- > Set up automated push alerts to text or email systems
- > Time-stamped footage is easily accessible for reports and site checks
- > Remotely administer multiple facilities through one efficient interface

APPLICATIONS

**OIL & GAS
DRILL SITES**

**CONSTRUCTION
SITES**

**SCHOOL
CAMPUSES**

**FARMS &
RANCHES**

**UTILITY
SUBSTATIONS**

ONE PLATFORM. TOTAL CONTROL.

The Twenty20 cloud platform gives you a single, integrated view into all your security, access control and automation operations at your remote sites and gives you real-time visibility and control over every aspect of your on-site operations.

- > All footage is stored in the cloud, not on a locally-stored device
- > Platform accessible via any web-enabled device: computer, tablet, phone
- > Control gates, camera systems and equipment online 24/7
- > View real-time video footage live
- > Access previously recorded events stored for up to 90 days
- > Delivers data-driven insights and reporting about your operations
- > Artificial Intelligence (AI) enables better management of voluminous data
- > AI enhances efficiency in identifying threats by decreasing false alarms

ABOUT TWENTY20 SOLUTIONS

Twenty20 Solutions will change the way you secure and optimize your operations across all of your remote sites. We are a global provider of automation and security technology, smart surveillance and access control solutions for both on and off-grid environments. We build intelligent technology into all our solutions, providing actionable data for real-time decision making.

Powered by AI, our technology solutions can analyze more video data than ever before and will change the way you interact with your security and automation systems. By bringing the most important events and insights to your attention, our technology is constantly at work, allowing you to focus on what matters most: your business.

Security & Surveillance

Solutions that give you peace of mind that your sites are secure so your team can focus on your business.

Monitoring

Real-time virtual protection against theft and vandalism that drastically lowers the cost of securing your business.

Access Control

Control who enters and exits your sites from any location for added security and minimize need for on-site personnel.

Automation

Gain total control over site activity to maximize productivity and efficiency with automated solutions.

Business Intelligence

Make data-driven decisions by leveraging data and analytics to gain a competitive advantage in your business.
